Madam:

Greetings of Peace!

J&G's Backyard Lettuce is a backyard lettuce farming using SNAP HYDROPONICS TECHNOLOGY of the University of the Philippines Los Baños. This technology has becoming popular especially among farmers who love farming even in a very limited spaces.

Being accredited by UPLB to share the said technology, the undersigned would like to ask permission to conduct seminar workshop in Balubal National High School since the school has the basic requirements needed in the conduct of the workshop like vermi cast, garden slots and garden tools necessary during the conduct of the activity. This activity will be conducted on December 27-28, one day session per batch. This activity will be participated by farmers coming Davao City, Butuan, Surigao, Misamis Oriental, Cagayan de Oro and other nearby cities and town. It is also an opportunity to invite your Gulayan sa Paaralan Coordinators and TVL-Agri Fishery Teachers to participate since this technology can be very significant to increase your teachers' competence in teaching agriculture in their classes.

Registration is 2,700.00 which covers meals and snacks, Handbook and Starter Kits.

If given approval, J&G's will conform to the conditions your office will be requiring us to comply.

Thank you and anticipating your kind approval.

Very truly yours,

JULIUS CARL GERONA
